

Macroeconomics B

Course Introduction and Practical Information

Brigitte Hochmuth

University of Copenhagen
Department of Economics

Block 4, 2026

Who I am and how to reach me

- ▶ Brigitte Hochmuth, Department of Economics, University of Copenhagen
- ▶ Email: `brigitte.hochmuth@econ.ku.dk`
- ▶ Office hours: Tuesdays 10:00–11:00
- ▶ Best way to reach me outside class: email
- ▶ Course material, hand-ins, and practical announcements will be on Absalon

What this course is about

- ▶ short-run macroeconomic fluctuations around the long-run trend
- ▶ investment and asset prices
- ▶ consumption
- ▶ monetary policy and aggregate demand
- ▶ inflation, Phillips curves, and aggregate supply
- ▶ stabilization policy in closed and open economies
- ▶ numerical examples, simulations, and some Python-based work

How the course is organized

- ▶ 7 weeks in Block 4
- ▶ 3x2 hours of lectures each week
- ▶ 2x2 hours of exercise classes each week
- ▶ Textbook: *Introducing Advanced Macroeconomics: Growth and Business Cycles*, 3rd ed.
- ▶ Lectures build theory and intuition; exercise classes focus on problem solving, data, and implementation
- ▶ Chapter 13 and some exercise-only or self-study material will be picked up in exercise classes

Exercise classes, assignments, and exam

- ▶ Exercise classes are meant to consolidate the lecture material and give you time to work through models and applications
- ▶ Two mandatory hand-in assignments must be submitted and passed to qualify for the exam
- ▶ Hand-ins will be managed through Absalon
- ▶ Final assessment: 48-hour individual take-home exam
- ▶ Exam window: Wednesday to Friday in block week 8

Lecture Plan: weeks 1–3

Date	Topic
20 Apr	Intro; Chapter 15: investment and asset prices
22 Apr	Chapter 15: investment, Tobin's q , and housing dynamics
27 Apr	Chapter 16: consumption
29 Apr	Chapter 16 and Chapter 17: consumption and monetary policy
4 May	Chapter 17: monetary policy and aggregate demand
6 May	Chapter 18: inflation, Phillips curves, and aggregate supply
11 May	Chapter 18 and Chapter 19: aggregate supply and the AS-AD model

Exercise classes follow the lecture sequence and are where we will also pick up Chapter 13 and selected technical sections.

Lecture Plan: weeks 4–8

Date	Topic
13 May	Chapter 19: the AS-AD model and stabilization policy
18 May	Chapter 20: expectations and macroeconomic dynamics
20 May	Chapter 21: policy and dynamics with expectations
27 May	Chapter 23 and Chapter 24: open economy models and exchange rates
1 Jun	Chapter 24 and Chapter 25: fixed and floating exchange-rate regimes
3 Jun	Chapter 25: open-economy stabilization and wrap-up
8 Jun	Recap and exam-oriented synthesis

Today

- ▶ short practical introduction to the course
- ▶ a quick look at the survey results
- ▶ Lecture 1: Chapter 15 on investment and asset prices
- ▶ then we start the regular lecture sequence

The first exercise class will begin with business-cycle facts and Chapter 13.
